Specific Mandate to Issue the Placing Shares

The Placing Shares will be allotted and issued under the Specific Mandate to be sought at the EGM.

REASONS FOR THE FIRST SUBSCRIPTION AND THE PLACING AND USE OF PROCEEDS

The Group is principally engaged in (i) apparel operation; (ii) money lending operation; and (iii) IP application and products operation.

The Group's current operations remain largely traditional, following a traditional model of "IP licensing — product design and development — outsourced manufacturing — sales." To stay competitive and drive growth, the Group recognizes the need for technological empowerment to upgrade this model. While actively pursuing business expansion, the Group continues to position itself as an "IP service provider," with its core processes rooted in the aforementioned model, complemented by offline promotional marketing and membership engagement services.

The business expansion will be built upon the existing business model by incorporating technology enablement, including but not limited to: (1) during the IP product design and development process, (i) applying Web3 blockchain technology to bring IP products "on-chain" and create a unique, tamper-proof and traceable digital identity for each IP product; and (ii) utilizing AI and VR technologies to achieve product digitalization (e.g. when users scan IP products, such as collectible sports cards, using a mobile application, the interface may display videos or animations and even enable real-time interactive engagement with users); and (2) during the provision of offline promotional marketing and membership engagement services, leveraging Web3 and AI technologies to empower marketing and membership engagement activities, such as membership identity management "on-chain" and AI-powered data analytics which produces business insights that in turn drives more targeted promotional marketing. The above-mentioned services will be add-ons to our existing IP services and only be provided to owners or licensees of such IPs.

Such technology applications are expected to ensure authenticity, traceability and standardized ownership of IP products to achieve secure digital IP management, addressing piracy and counterfeit issues through technological solutions, while bringing more fun to IP products and strengthening user engagement and loyalty, thereby further unleashing and elevating the intrinsic value of such IPs.

Usage of the net proceeds from the issue of the Subscription Shares

The Company intends to use the net proceeds from the issue of the Subscription Shares (assuming the Subscription Shares are subscribed in full by the Investor) in the amount of HK$6.8 million as to (i) approximately HK$4 million for the Saudi Industrial IP Business, the Company has established the cooperation agreement with the Ministry of Industry of Saudi Arabia. According to the cooperation agreement, the Company will assist Saudi Industrial IP to carry out the overall intelligent upgrade, including of its industrial IP. An initial investment of HK$8 million is expected for paying expenses including establishing the Company's Saudi Arabian headquarters, team composition, business expansion, and project system design; and (ii) approximately HK$2.8 million for provision of general working capital of the Group.

Usage of the net proceeds from the issue of the Warrant Shares

The Company intends to use the net proceeds from the issue of the Warrant Shares as follows (assuming the Warrant Shares are fully subscribed and the maximum net proceeds are raised therefrom (after deduction of related expenses)), which are expected to be approximately HK$60 million.

(i) Approximately 16.6%, or HK$10 million, will be used for proceeding with projects that have been validated as feasible for expanding existing business, such as existing sports-related IP projects (including the La Liga club* (西甲俱樂部) project, which focuses on development and design of La Liga club-related physical and digital IP products, as well as various promotional marketing and membership engagement activities such as IP-themed street experience). Such projects aim to, leveraging Web3 and AI technologies, dig deeper into our robust strategic partnerships and cooperations with multiple globally renowned brand owners or agents;

(ii) Approximately 41.7%, or HK$25 million, will be used for proceeding with IP licensing arrangements with high potential to deliver attractive returns on investment in consumer sectors such as culture, sports, tourism, healthcare and wellness. The Company is currently in the process of seeking and evaluating such collaboration opportunities. As of the date of this announcement, no specific IP licensing arrangement had been located; and

(iii) Approximately 41.7%, or HK$25 million, will be used for general working capital purposes, such as expansion of our in-house business operation team undertaking financial, investor relations, marketing and daily operational roles.

Usage of the net proceeds from the Placing

Upon Completion, the maximum aggregate gross proceeds from the Placing is expected to be approximately HK$51.00 million. The maximum net proceeds from the Placing (after deduction of the placing commission in respect of the Placing and other related expenses including, among others, the professional fees, is estimated to be approximately HK$49.30 million, representing a net issue price of approximately HK$0.82 per Placing Share. The Group intends to apply the net proceeds as to

(i) approximately HK$5 million for the first phase of the initial platform development and AI capability building, to build a core technology team (approximately 5-10 front-end developers, 5-10 back-end developers, and 5-10 blockchain engineers) and hire external technical services. It will also complete the initial design and framework development of the platform's infrastructure (user system, transaction engine). AI functionality includes developing AI data analysis models, improving the connection between entities and the platform through technologies such as QR codes, and developing a mobile app;

(ii) approximately HK$15 million for the investment in the Manchester United sports IP business, the Company and a copyright holder of Manchester United shall carry out joint cooperation business in respect of Manchester United's IPs in the Mainland China, Hong Kong and Macau, including IP clothing, IP merchandising, IP offline experience, etc. The Company intends to lock up the interests of IP cooperation through a small amount of capital investment and limiting the use of funds, so as to expand and enrich the Company's sports IP business;

(iii) approximately HK$4 million for the Saudi Industrial IP Business, the Company has established the cooperation agreement with the Ministry of Industry of Saudi Arabia. According to the cooperation agreement, the Company will assist Saudi Industrial IP to carry out the overall intelligent upgrade, including of its industrial IP. An initial investment of HK$8 million is expected for paying expenses including establishing the company's Saudi Arabian headquarters, team composition, business expansion, and project system design;

(iv) approximately HK$3 million for marketing and user ecosystem construction for online and offline promotion activities to attract the first batch of core users and merchants to the platform; and

(v) the remaining HK$22.3 million will be used as general working capital of the Group including headquarters daily operating expenses, professional service expenses, team expansion, etc.

Having considered the above, the Directors consider that the First Subscription Agreement and the Placing represent an opportunity to raise capital for the Company while broadening its Shareholders and capital base. The Directors are of the view that the First Subscription and the Placing will strengthen the financial position and liquidity of the Group and provide funding to the Group for its business expansion and development as well as working capital without incurring interest costs.

The Directors consider that the First Subscription Agreement is entered into on normal commercial terms following arm's length negotiations between the Company and the Investor pursuant to the Shares Subscription Facility Agreement and are fair and reasonable and are in the interests of the Company and the Shareholders as a whole.

The Directors also consider that the Placing Agreement is entered into upon normal commercial terms following arm's length negotiations between the Company and the Placing Agent and the terms of the Placing Agreement (including the Placing Price and the placing commission) are fair and reasonable and are in the interests of the Company and the Shareholders as a whole.
