## INTRODUCTION

Reference is made to the voluntary announcements of the Company dated 7 April 2025 and 27 June 2025 in relation to the possible acquisition of not more than 15% equity interest in the Target Company.

The Board is pleased to announced that on 14 July 2025 (after trading hours), the Company (as purchaser) , the First Vendor and the Second Vendor entered into the Agreement, pursuant to which the Company has conditionally agreed to purchase, and the Vendors have conditionally agreed to sell, 10,860 Sale Shares, representing approximately 10.00% of the entire equity interest in the Target Company (or approximately 9.07% of the entire issued shares on a fully diluted basis upon the conversion in full of the N-Noble Preference Shares) at the Consideration of HK\$15 million, which will be satisfied by the allotment and issue of 37,500,000 Consideration Shares.

## THE AGREEMENT

The principal terms of the Agreement are as follows:

### *Date*

14 July 2025 (after trading hours)

### *Parties*

- (i) the Company (as purchaser);
- (ii) Mr. Wu Zheng (as First Vendor) ; and
- (iii) Mr. Gao Chong (as Second Vendor)

### ***Assets to be acquired***

Pursuant to the Agreement, the Vendors have conditionally agreed to sell, and the Company, as purchaser, has conditionally agreed to purchase in aggregate 10,860 Sale Shares, representing approximately 10.00% of the entire issued shares of the Target Company (or approximately 9.07% of the entire issued shares on a fully diluted basis upon the conversion in full of the N-Noble Preference Shares).

Each of the First Vendor and Second Vendor will sell 9,500 Sales Shares and 1,360 Sales Shares respectively.

### ***Consideration***

The Consideration of HK\$15 million, shall be satisfied in full by the allotment and issue of 32,803,868 Consideration Shares to the First Vendor and 4,696,132 Consideration Shares to Second Vendor respectively under Specific Mandate, at the Issue Price of HK\$0.40 per Consideration Share upon Completion.

The Consideration was determined after arm's length negotiations between the Company and the Vendors on normal commercial terms after considering the preliminary valuation of the 10% equity interest in Target Company of approximately HK\$18.43 million and the reasons for and benefits of the Acquisition as described under the paragraph headed "Reasons for and benefits of the Acquisition" below. Further information on the Valuation will be included in the Circular relating to the Acquisition to be despatched.

### ***Valuation***

The valuation of the Target Company was conducted by Acclime Consulting (Hong Kong) Limited, the independent Valuer, who has the necessary qualifications to perform the Valuation and also has sufficient experience in carrying out similar valuations. The assessed value of 10% equity interest in Target Company as at 31 May 2025 was HK\$18.43 million.

### ***Valuation approach***

According to the valuation report, the Valuer has considered income approach, market approach and asset approach for determining the appraised value.

Since (i) separately identifiable cash flows attributable to the Target Company were available, and the Target Company was not under liquidation, asset approach was not adopted; (ii) the future growth pattern and cost structure of the Target Company may differ from the listed comparable companies, and they may not be perfectly comparable in terms of their differences in size, market share, geographical location and other operating and financial status, market approach was not adopted, the Valuer considered that income approach was a more appropriate methodology to be adopted in the valuation.

The fair value of the equity interests in the Target Company was developed through the application of the income approach technique known as discounted cash flow method ("DCF") to devolve the values of future free cash flows generated by the business into a present value. This method eliminates

the discrepancy in the time value of money by using a discount rate to reflect all business risks including intrinsic and extrinsic uncertainties in relation to its business operation.

### ***Basis and Assumption***

The valuation of the total shareholders' equity of the Target Company has been prepared on the following principal assumptions.

#### **General Assumptions**

- (i) there will be no material change in the existing political, legal, technological, fiscal or economic conditions which might adversely affect the economy in general and the business of the Target Company;
- (ii) the Target Company complies with the relevant laws and regulations in all respects from time to time and there will be no unforeseeable events that will cause material adverse impacts on the business of the Target Company;
- (iii) the accounting policies to be adopted and adopted as at the date of preparation of the valuation report will be consistent in material respects; and
- (iv) there will be no material changes in the relevant interest rate, exchange rate, taxation and other policy-related fees and charges.

#### **Specific Assumptions**

- (i) all information provided by the Target Company are accurate to be relied on in arriving at the Valuation;
- (ii) all documents provided by the Target Company for the purpose of the Valuation, including business contracts, the business licenses are genuine, valid and enforceable to derive future cashflows;
- (iii) the unaudited financial statements of the Target Company as at 31 May 2025 as provided by the management of the Target Company could reasonably represent the Target Company's financial position as true and fair on the valuation date; and
- (iv) any changes in the costs and expenses of the Target Company will follow historical trends without any material abnormal changes.

### ***The income approach***

Under this approach, all future economic income streams attributable to the business enterprise are discounted by the weighted Average Cost of Capital ("WACC") into a present value. WACC represents an average cost of capital from all sources of financing. In arriving the WACC for the

Target Company, the Valuer has taken into account of the cost and structure of debts and equities of the Target Company and several selected comparable companies operating in similar business. Finally, the WACC of 17.37% was adopted to arrive at the business enterprise value.

Furthermore, given the absence of a ready market for the Target Company's equity interests (unlike publicly traded equivalents) and the interest to be acquired is non-controlling interests, the business enterprise value is further adjusted for lack of marketability and lack of control.

Set out below is the summary of calculations for the fair value of 10% equity interest in the Target Company as at 31 May 2025:
